KINDERGARTEN ENRICHMENT PROGRAM

GMPS K-Club is a science-themed Kindergarten Enrichment Program designed to enhance children's learning beyond the traditional kindergarten classroom. Children will explore fun and creative hands-on activities in a rich learning environment.

Teachers will use both individual and cooperative group experiences to reinforce their Kindergarten classroom learning. Children will develop social-emotional skills in this smaller group experience, which also allows for greater individual attention and differentiation.

We will explore each topic through art, literacy and math activities as well as scientific investigation and journaling. Our K-Club topics will include: Hibernation, Migration, and Adaptation; Shadows and Silhouettes; Weather, Wind and Magnets; The Five Senses; Spring Growth and Animal Babies.
